OFF-ROAD VEHICLE (ORV) TRAIL AND ROUTE MAINTENANCE HANDBOOK

Michigan Department of Natural Resources
Forest, Mineral and Fire Management
Grants Management

IC 1991 (Rev. 01/30/2006)

NON-DISCRIMINATION STATEMENT

The Michigan Department of Natural Resources provides equal opportunities for employment and access to Michigan's natural resources. Both state and federal laws prohibit discrimination on the basis of race, color, national origin, religion, disability, age, sex, height, weight or marital status under the Civil Rights Acts of 1964 as amended, 1976 MI PA 453 and MI PA 220, Title V of the Rehabilitation Act of 1973 as amended, and the 1990 Americans with Disabilities Act as amended. If you believe that you have been discriminated against in any program, activity, or facility, or if you desire additional information, please write: Human Resources, Michigan Department of Natural Resources, P.O. Box 30028, Lansing, MI 48909-7528 or the Michigan Department of Civil Rights, Cadillac Place, Suite 3-600, 3054 W. Grand Blvd., Detroit, MI 48202 or the Division of Federal Assistance, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Mail Stop MBSP-4020, Arlington, VA 22203.

This handbook is intended to provide guidance to DNR field staff and grant sponsors in consistent standards for trail and route sign installation, placement, and trail maintenance.

TRAIL CLEARANCE STANDARDS

Trails/routes should be cleared of brush, branches, and obstructions within dimensions according to the following diagrams.

ORV trails include two categories: *Motorcycle Trails* are to be cleared to 24 inches width at ground level and 40 inches at handlebar level up to 8 feet. *ATV Trails* are to be cleared to 50 inches width up to 8 feet. *ORV Routes* are to be cleared to 72 inches width up to 8 feet.

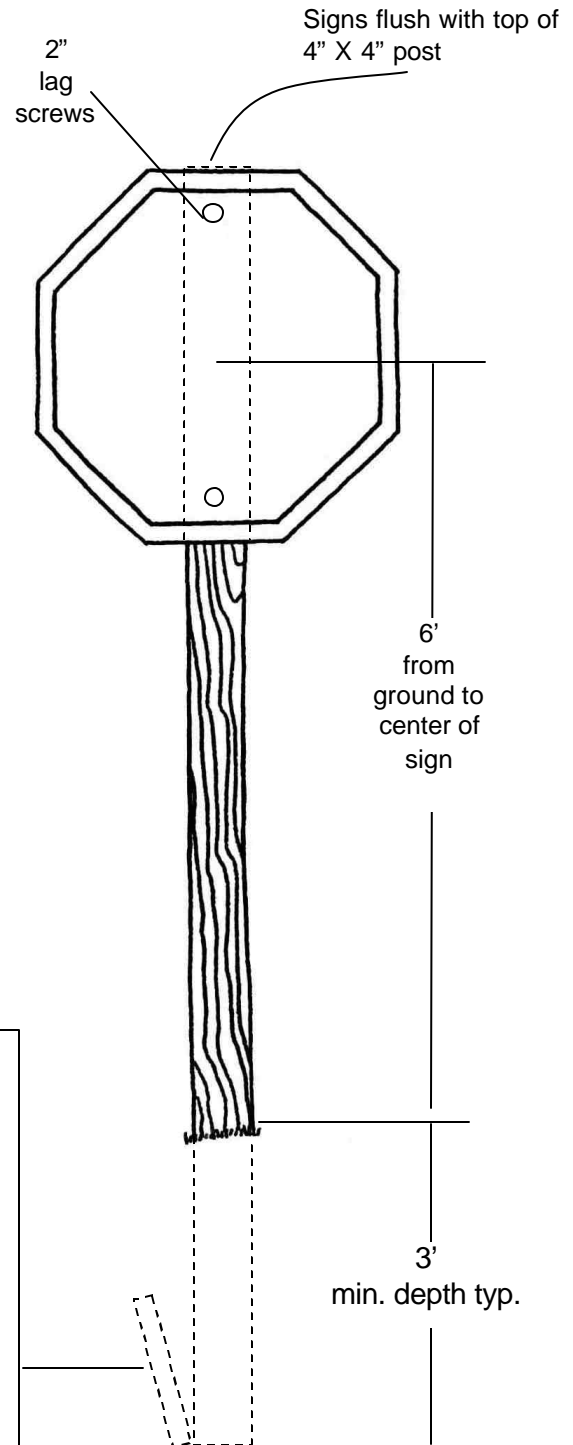

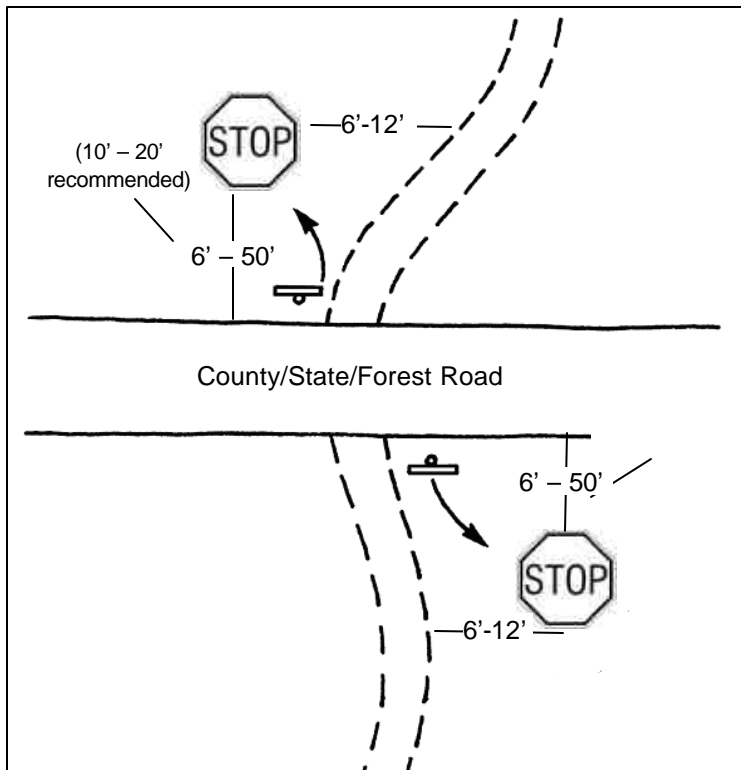

SIGNS

STOP SIGNS

Highway-type stop signs shall be used on trails. Stop signs shall be 24" X 24" reflectorized octagon, with white lettering and border on red background. Stop signs shall be affixed to 4" X 4" treated wooden posts.

Stop signs shall, at a minimum, be placed at all trail intersections with county, state, and forest roads. Signs shall be placed at the point where the vehicle is to stop or as near to that point as practical. Signs shall be affixed to posts with two 2" lag screws.

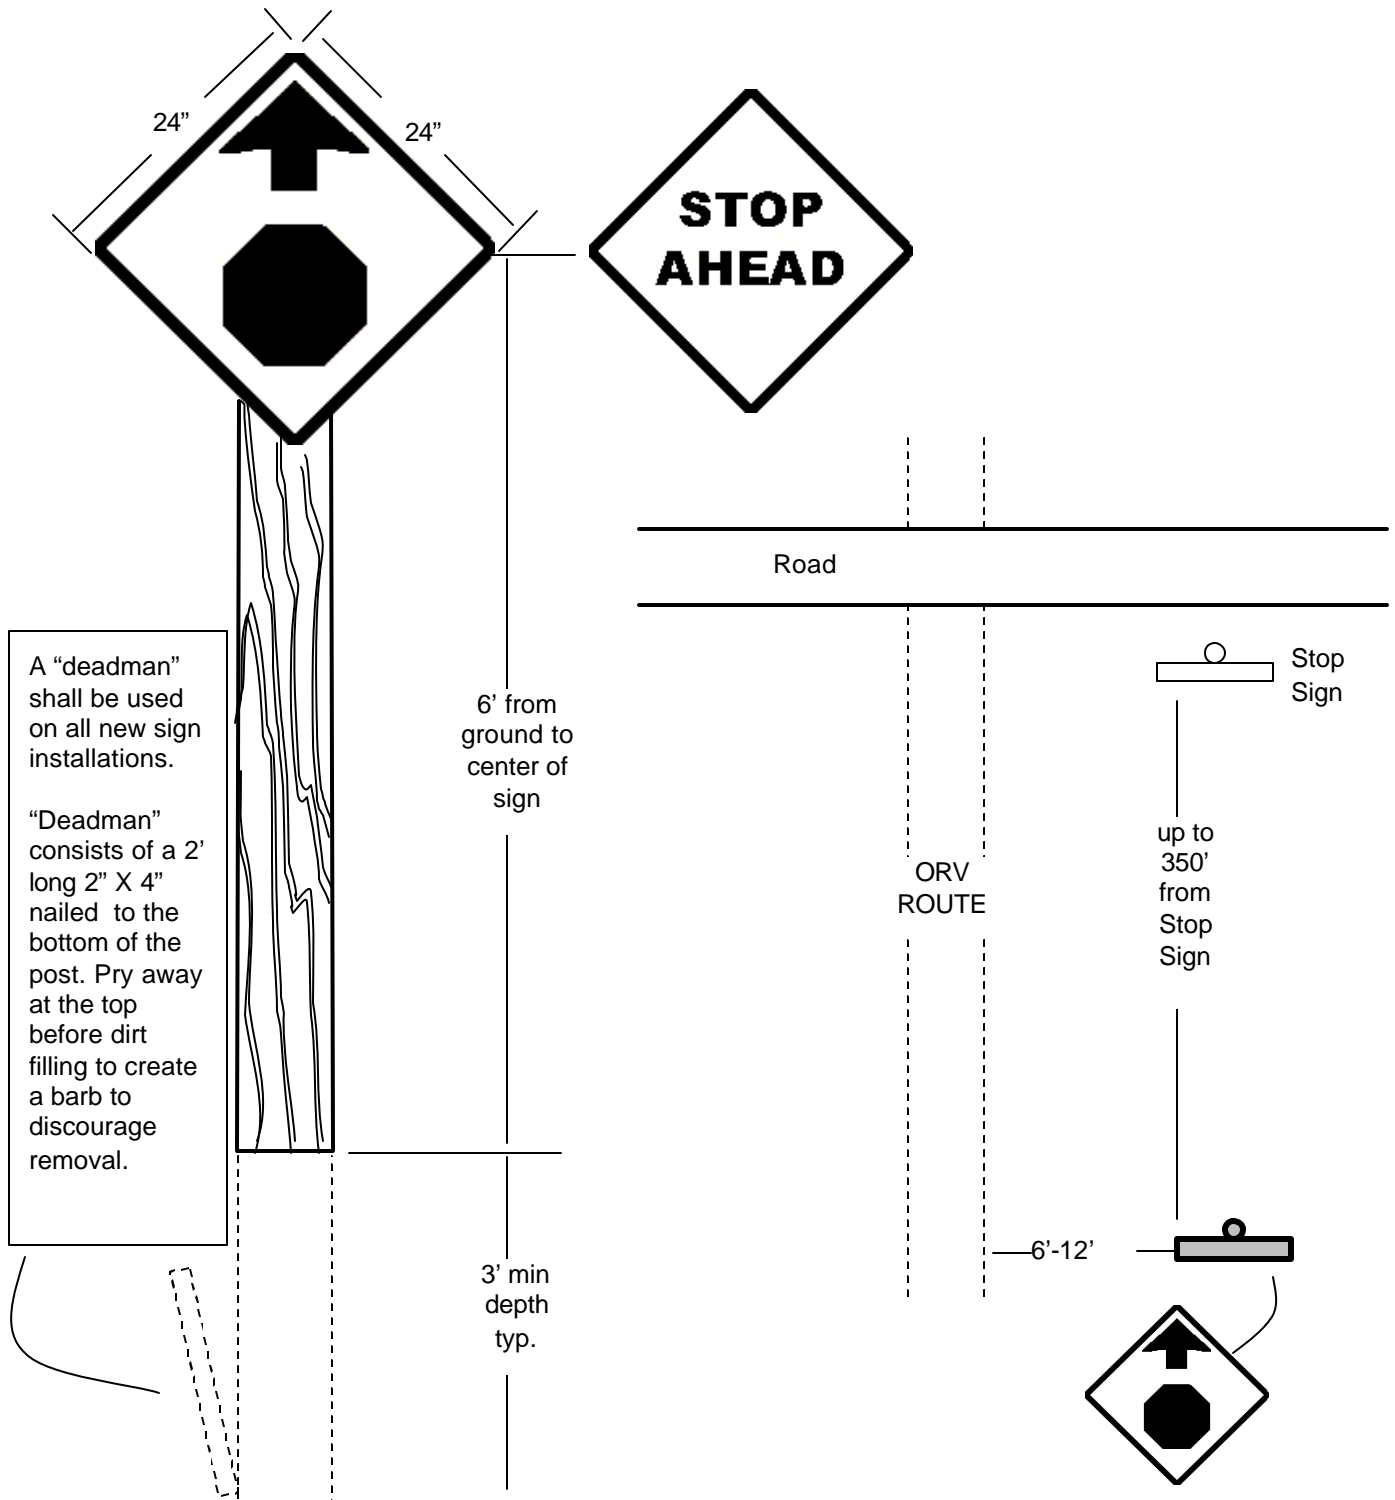

A "deadman" shall be used on all new sign installations.

"Deadman" consists of a 2' long 2" X 4" nailed to the bottom of the post. Pry away at the top before dirt filling to create a barb to discourage removal.

STOP AHEAD SIGNS

24" X 24" reflectorized diamond, black graphics or text and border on yellow background. Signs shall be affixed to 4" X 4" treated wooden posts.

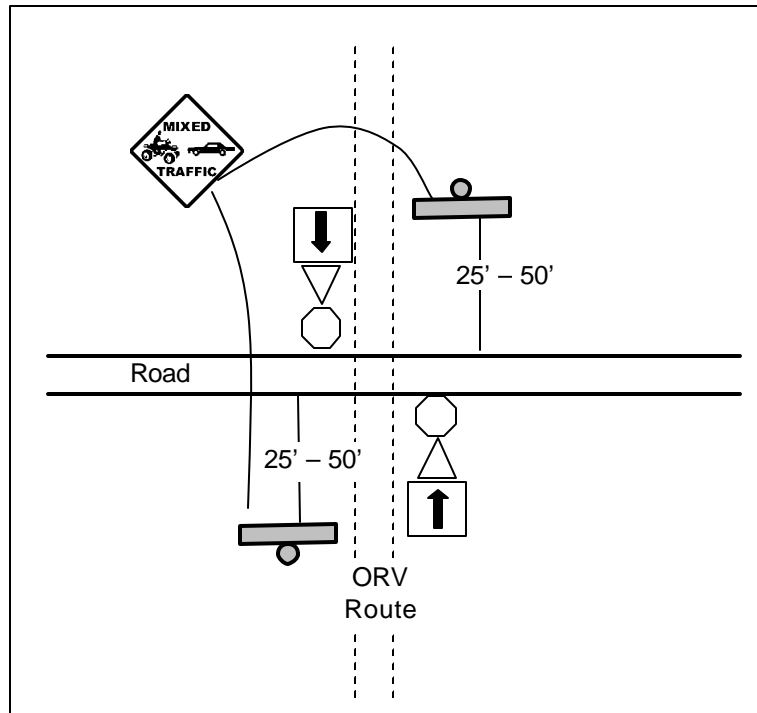

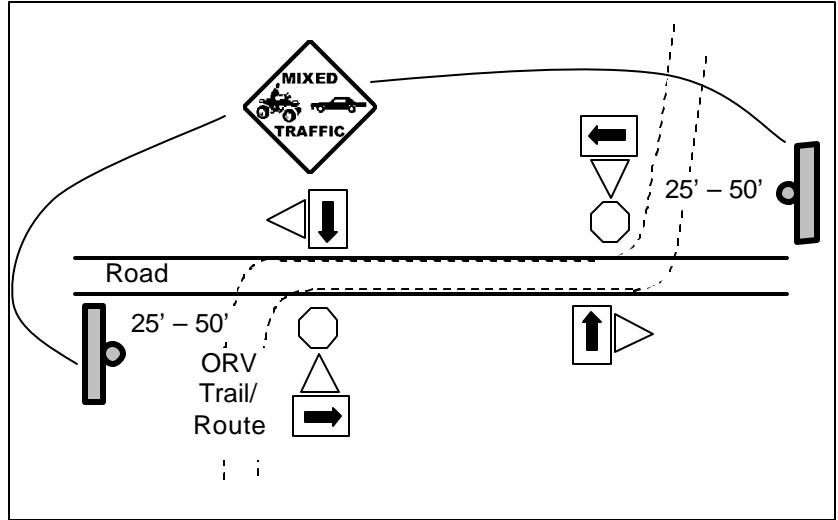

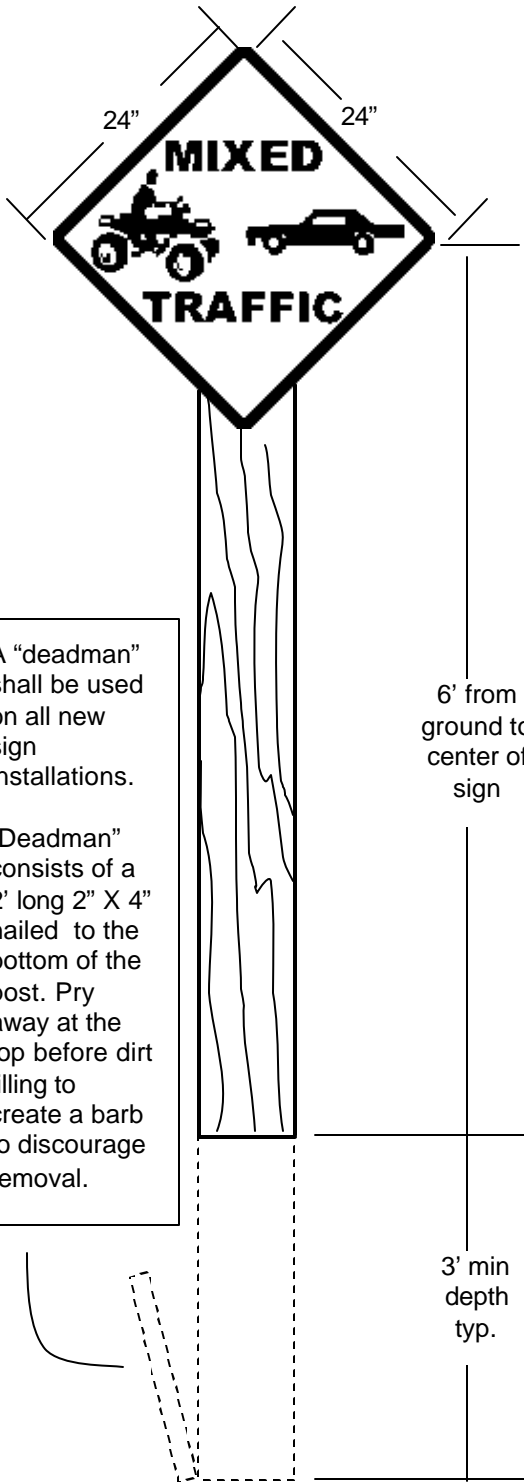

These signs shall be used along designated forest routes and trails whenever traffic needs advanced warning of a pending STOP. This sign is not expected to be needed on trails, as they are narrow and slow of speed. However, when necessary, such as when longer straight segments lead riders into intersections at speeds in excess of 20 miles per hour, these signs will be placed to provide adequate warning to the rider.

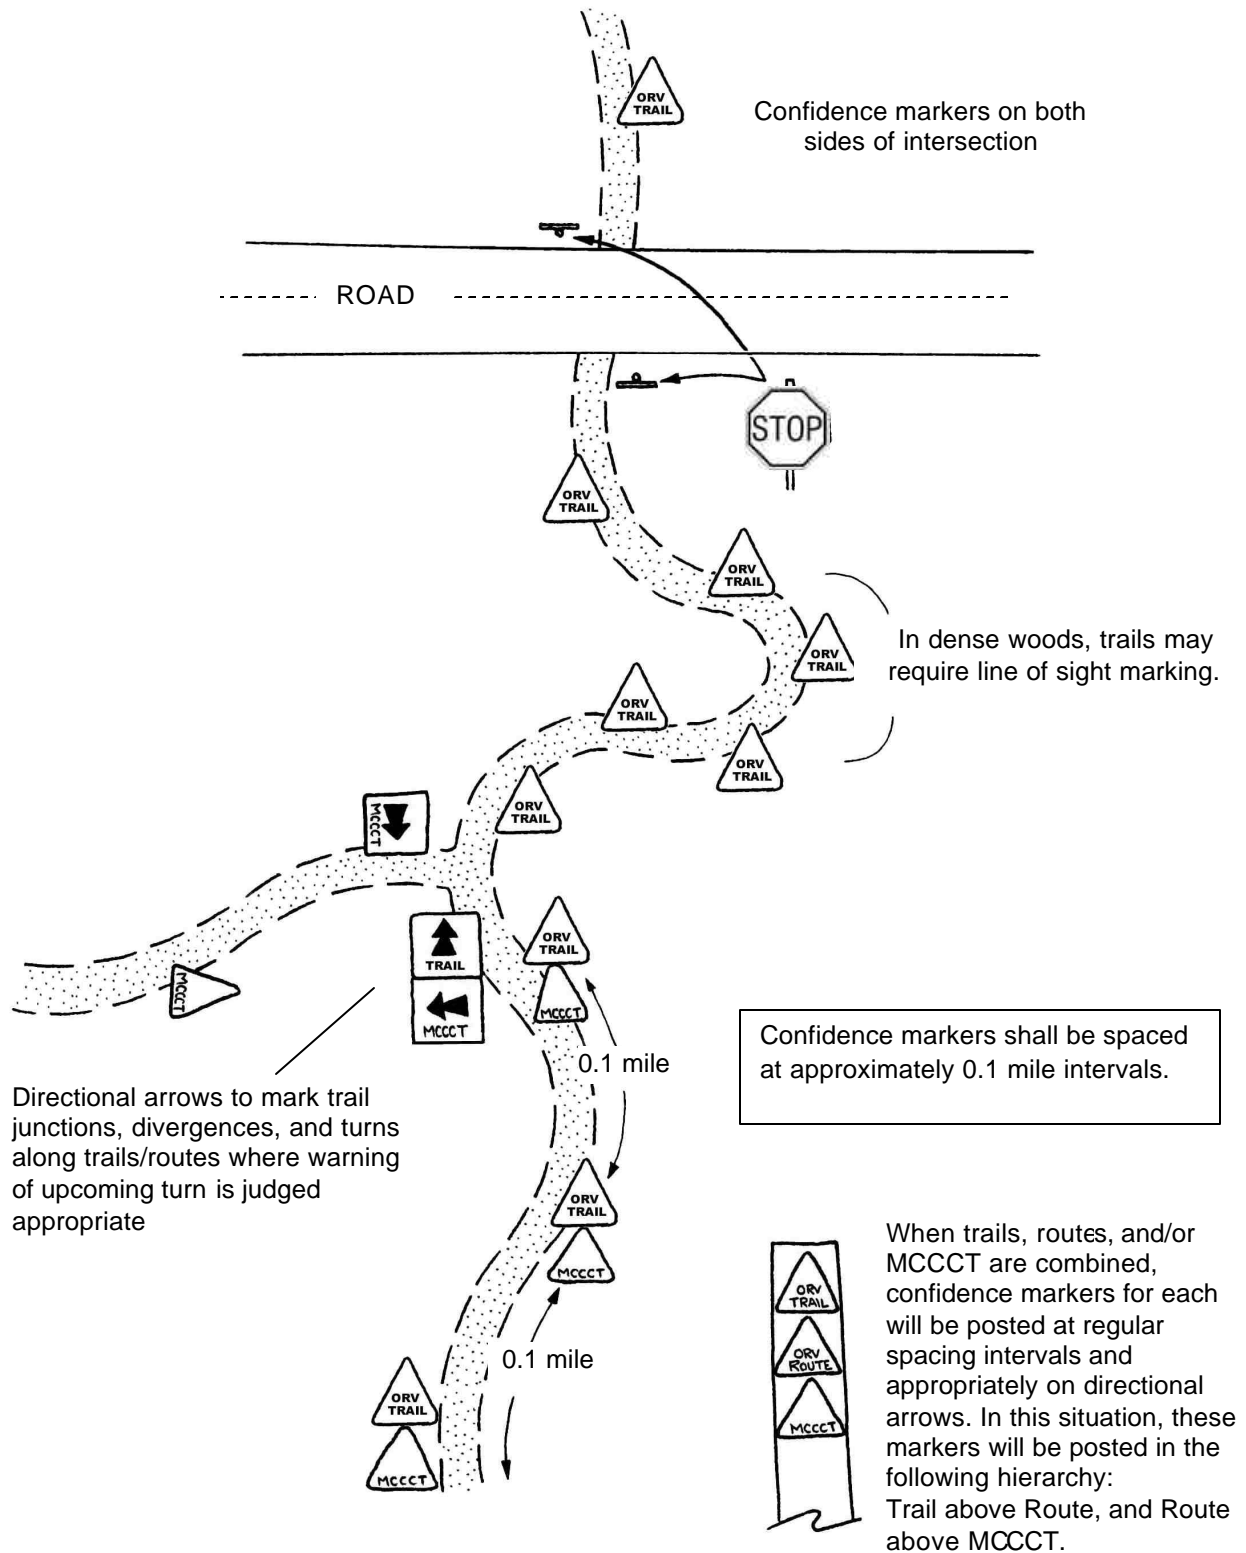

MIXED TRAFFIC SIGNS

24" X 24" reflectorized diamond, with black lettering, border, automobile and ATV symbols – on yellow background.

Placed along road at point where a trail or route begins following forest roads designated open to ORV use.

TRAIL MARKINGS

GUIDE SIGNS

Trails and Routes shall be identified by 5" X 5" X 5" orange triangles (confidence markers) labeled with appropriate symbol and text. Confidence markers will be placed on both sides of intersections with all roads and trails and along trails and routes at approximately 0.1-mile intervals. In dense woods trails/routes may require more frequent confidence marking within line of sight. Brush should be removed from around sign to ensure clear visibility. No signs are to be posted on utility poles.

Michigan Cross-Country Cycle Trail

Motorcycle Trail

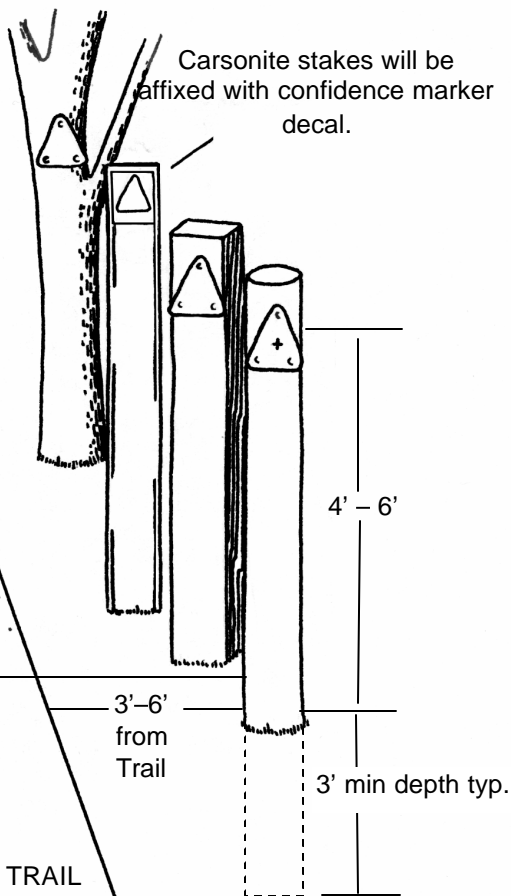

All Terrain Vehicle Trail for ATV's and motorcycles

Off-Road Vehicle Route for vehicles of all sizes

Confidence markers shall be posted on 3 inches round posts, 4" X 4" treated wooden posts, 3" X 5" landscape timbers, or carsonite stakes (use marker decal), or affixed to a tree.*

Three 2" aluminum or magnesium nails affix confidence marker in upright position.

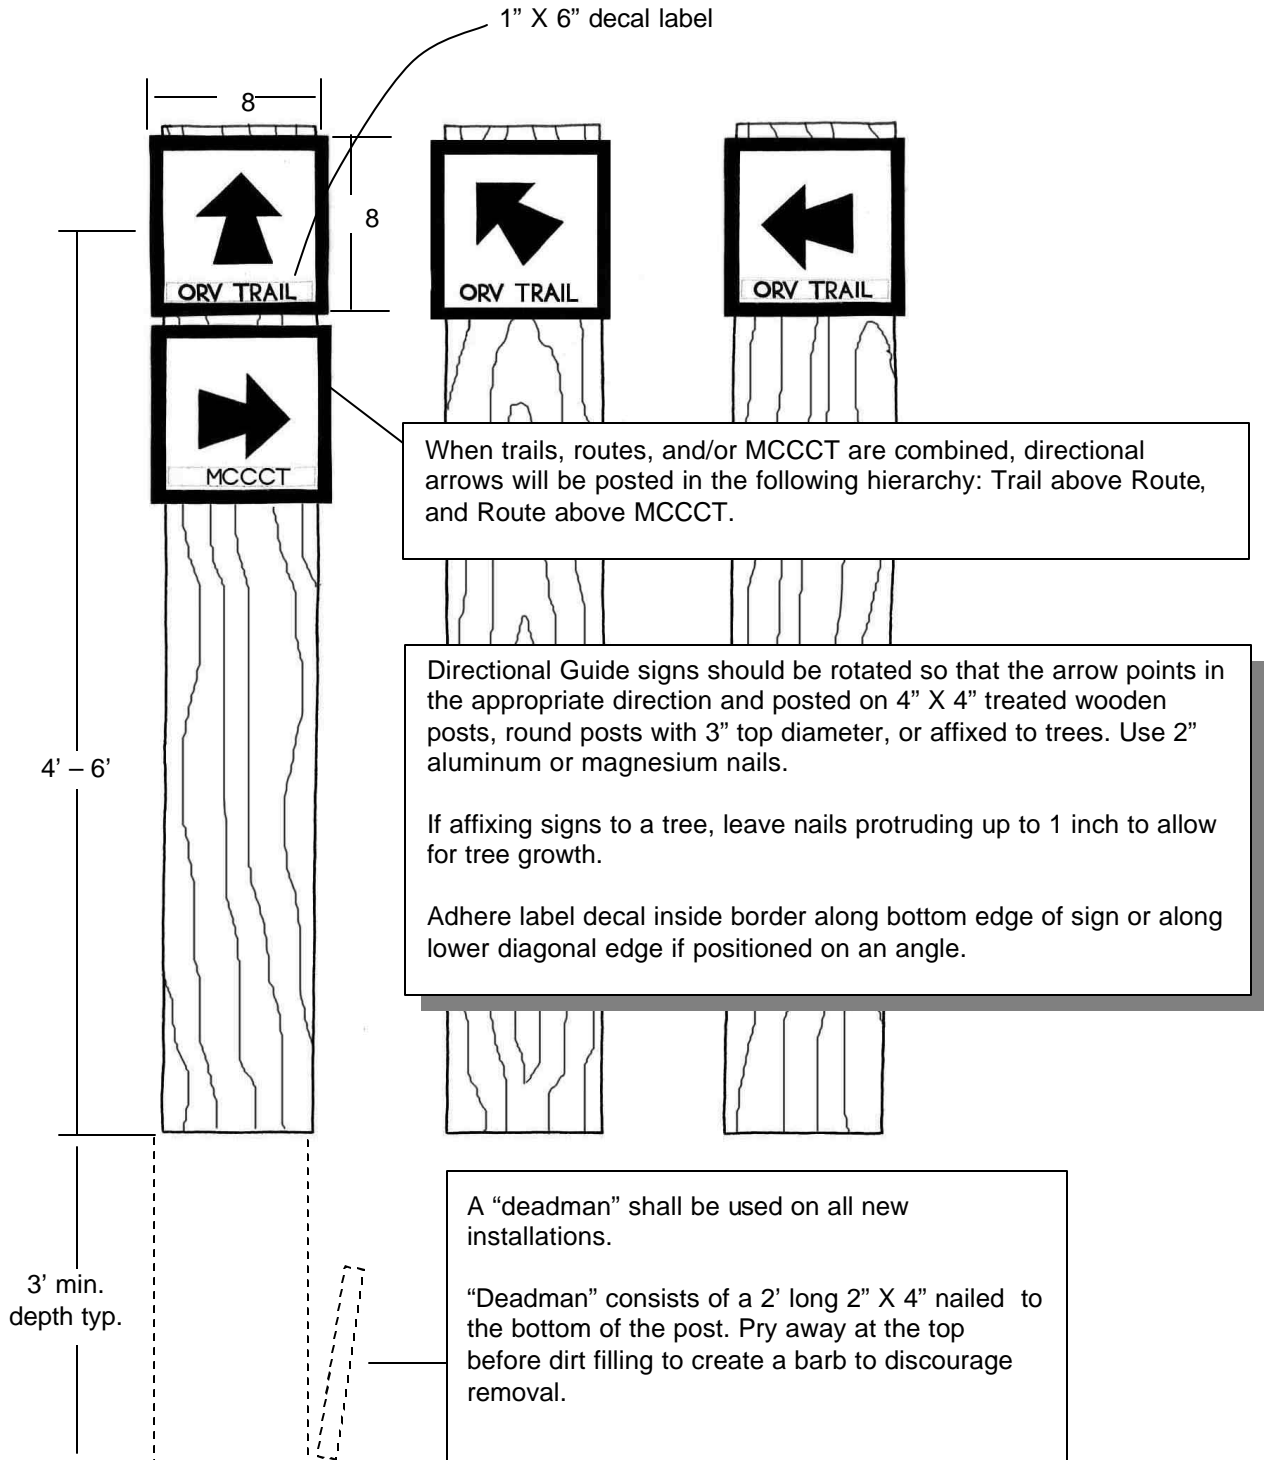

If posted on a tree*, leave nails protruding up to 1" to allow for tree growth. Do not obstruct lettering.

***NOTE: The DNR is currently reviewing sign policy and is moving toward removing all markers from trees.**

DIRECTIONAL GUIDE SIGNS

8" X 8" white square with black arrows are to be used at trail intersections, crossings, turns, trail heads, etc.

These Directional Guides will be labeled appropriately "TRAIL," "ROUTE," or "MCCCT" according to which facility they apply. This label will be a 1" X 6" adhesive decal which will be attached at time of posting.

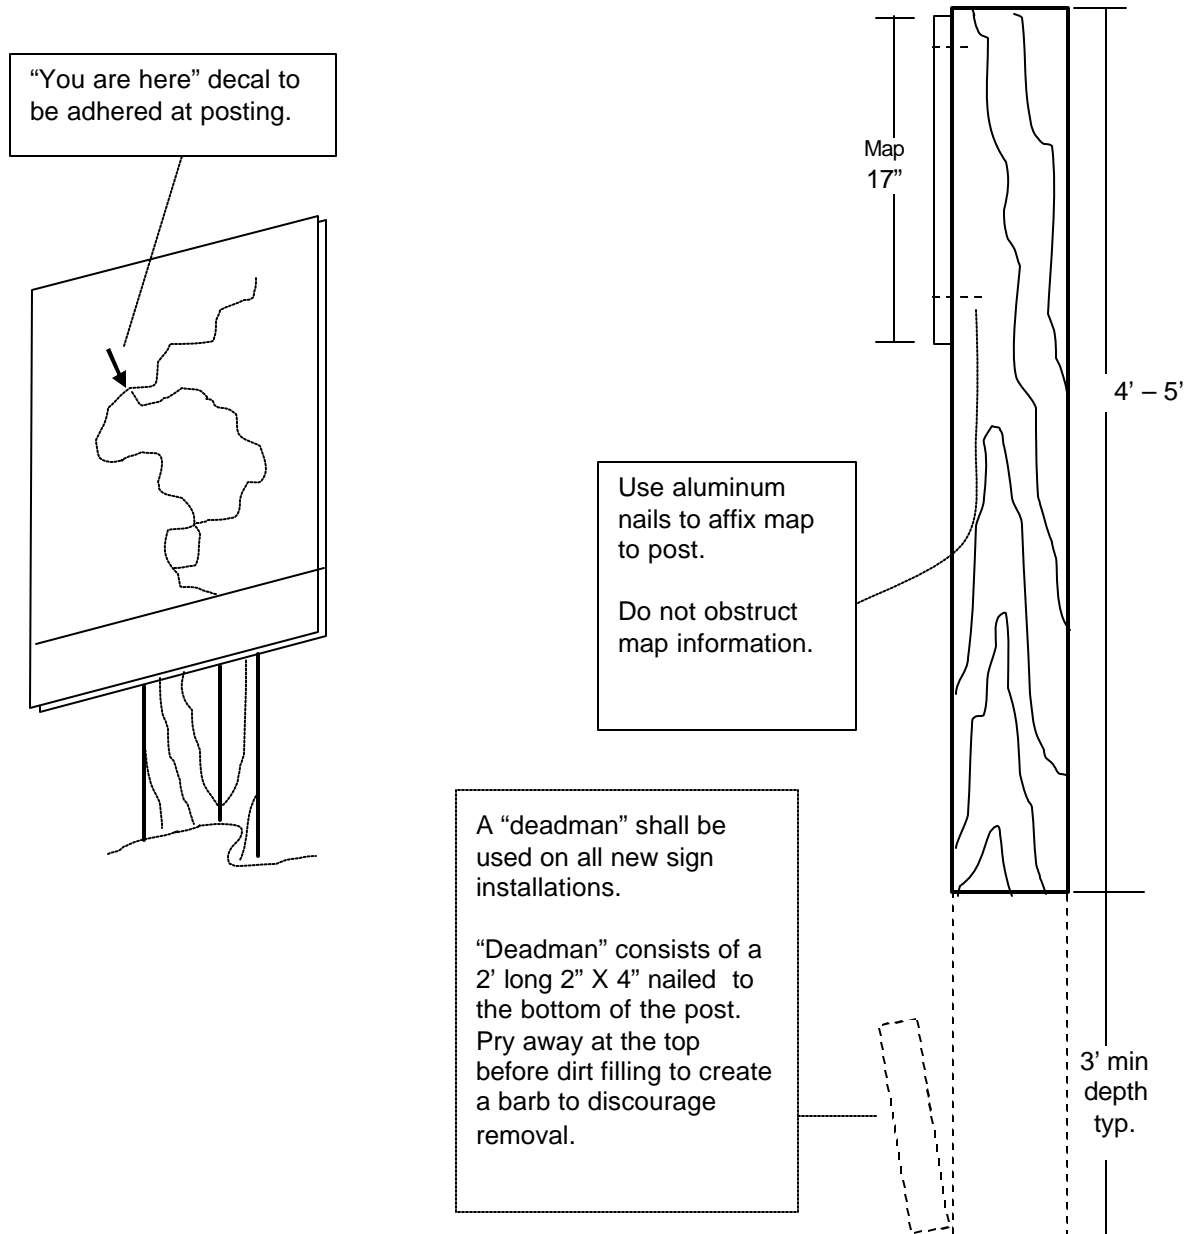

INFORMATIONAL SIGNS

Informational signs and “You-Are-Here” signs shall be placed at trailheads and at appropriate locations along trails.

At trailheads these signs shall be routed wood signs. They shall provide direction to entrances, parking, trail name, distances, regulations, emergency phone numbers, etc. A plastic “You-Are-Here” map shall be posted in the information station under the Plexiglas cover along with other trailhead information.

Along trails “You-Are-Here” maps shall be placed at appropriate trail and route intersections and illustrate the rider’s location as well as destinations. They should be visible to ORV riders but located to minimize opportunity for vandalism. These shall be plastic 11” X 17” trail maps affixed to a 3” X 5” landscape timber or 4” X 4” treated wooden post.

STREET LICENSING NOTICE

12" X 18" reflectorized rectangle with black lettering on white background sign. This sign will emphasize when the street license from the Secretary of State is required.

The sign reads "NOTICE Secretary of State Licensing Required Beyond This Point." This sign will be posted just prior to the point where the MCCCT enters a road upon which vehicular use requires such licensing.
